

TIEC

TRAUMA INFORMED EDUCATION COALITION

WHAT IS TRAUMA?

EARLY CHILDHOOD TRAUMA CAN OCCUR WITH CHILDREN AGES 0- 6. REPEATED TRAUMA CAUSES THE BRAIN TO CONSTANTLY BE IN A STATE OF HIGHER ACTIVITY, CHANGING CHILDREN'S COGNITION.

Secondary trauma can stand from exposure to someone else's trauma. It often occurs in the workplace.

Trauma is an reaction triggered by experiencing or witnessing a deeply distressing or catastrophic event.

ACUTE TRAUMA HAPPENS AFTER A SINGLE INCIDENT, CHRONIC TRAUMA OCCURS AFTER MULTIPLE REPEATED EVENTS, AND COMPLEX TRAUMA HAPPENS AFTER MANY DIFFERENT TRAUMATIC EVENTS.

TIEC PRINCIPLES

1

Understanding
Trauma and it's
impact

2

Promoting
Safety

3

Ensuring
Cultural
Competence

4

Supporting
Resilience

5

Sharing
Influence

6

Integrating
Systems

7

Building
Relationships

8

Instilling Hope

TIEC upholds eight fundamental principles to maximize our impact in assisting a diverse range of individuals.

TIEC

The Trauma Informed Education Coalition equips diverse communities to recognize and mitigate the impact of psycho-social, emotional, and neuropsychological trauma through developing trauma informed training and practices which can be implemented across a variety of disciplines/fields.

Numerous symptoms of trauma in children often manifest in behaviors such as misbehavior and perfectionism. TIEC provides valuable lessons aimed at raising awareness of these symptoms. By enhancing recognition, TIEC empowers individuals to effectively support children, fostering understanding and guidance instead of punitive measures.
